Java (Android environment)	strong basics	3 months

In order to keep this list brief and readable I have excluded individual frameworks and technologies. If more detail is required, please contact me - I would be more than happy to provide specifics.

PERSONAL STATEMENT

I'm an enthusiastic team worker with a strong passion for solving problems and applying new technologies and methods. I am constantly learning and improving. I believe strongly in the value of a good attitude, and applying yourself to the very end.

I am comfortable in both front and back end environments, from design to database. I always resolve to do my best, and I am proud of my work.

Please see [my portfolio](#) for examples of my projects and production work.
